Every second counts! The reality is without a defibrillator (AED) the chance of surviving sudden cardiac arrest is almost zero. Every minute that goes by, the chance of survival drops 10%. This means we only have 10 minutes to save a life.

The good news; AEDs are very easy to use and belong everywhere - home, work and cottage!

Leaders in the Industry! Action First Aid is helping businesses and home owners across Canada establish strong AED programs. Our experienced staff will help you from start to finish - choose the right machine, provide exceptional training, and track your pads and batteries.

Training and Full Support! Action First Aid offers a full spectrum of cost-effective training programs to ensure your staff is confident to step in and take action.

Be the reason for the next great save! Call us today!
